## Iprox CONTROLLERS

Iprox controllers are electronic devices, permanently connected to the Internet, which collect information from the environment in which they are installed and transmit it to a web application (Iprox Cloud, Iprox Factory or Iprox Irrigation) where the consolidated data can be accessed. Moreover, all the devices in the project can be controlled.

### MAIN FEATURES

- Modbus TCP/RTU bi-directional gateway to Iprox Cloud
- Digital input, relay outputs
- Analog input and outputs (sensor reading, set-point control)
- Cloud Monitoring, control and automation of any kind of machine, pump station or process
